

*DataEye Vulnerability Assessment
Data Sheet*

KEY BENEFITS & FEATURES

DISCOVER NETWORK ENVIRONMENT

Discover all network devices and applications, including desktops, servers, operating systems, applications, routers, firewalls, PDAs, wireless devices, as well as many other network elements.

MANAGE NETWORK ASSETS

Define your "mission critical" assets by their importance to your business operations using a 5 tier rating system from Low to Critical.

IDENTIFY NETWORK SECURITY VULNERABILITIES

The external and internal scanners safely and accurately detect security vulnerabilities across your entire network.

ANALYZE THREATS

DataEye Consulting provides a detailed description for each vulnerability that includes: the security threat, consequences if the vulnerability is exploited, and the recommended solution to fix the vulnerability, including links to the appropriate patches.

MANAGE AND ELIMINATE VULNERABILITIES

DataEye Consulting also provides an array of remediation reports providing security managers with a current snapshot on remediation status and progress.

POWERFULL REPORTING

Intuitive and easy-to-read reports provide both executive-level summaries and detailed technical analysis.

WEB APPLICATION SCANNING

DataEye Consulting is testing web application vulnerabilities such as those in the OWASP Top 10 and WASC-TC, including "SQL injection", "cross-site scripting" and "web site misconfigurations".

AUTHENTICATED SCANNING

Given only a user name and password, the web crawler automatically identifies HTML form login page(s), and monitors the session state to ensure an authenticated scan remains authenticated throughout the crawl.

DATAEYE SERVICES

Vulnerability Assessment

Evaluate the network complexity and determine the exact scope of work.

Perform vulnerability scanning and create appropriate technical reports.

Create a high level network design architecture report.

Consulting services for vulnerability remediation.

Perform vulnerability scanning to confirm the remediation.

Create appropriate technical and executive reports.

Web Application Scanning

Identify the application dependencies and all the systems involved in application delivery.

Perform Application Vulnerability scanning and generate reports.

Confirm identified vulnerabilities and their impact.

DATAEYE VULNERABILITY ASSESSMENT

Benefits:

- Accurate and always up-to-date vulnerability audits.
- Trusted, unbiased third-party security auditing and compliance reporting meets industry and regulatory compliance requirements.
- Discover all assets across the entire network.
- Comprehensive Reporting.
- Remediation methods including patch paths
- Requires no software to install, update or maintain.
- Cost efficient with no hidden costs across the entire network.
- Lower and Predictable TCO. On demand SaaS technology offers significant economic advantages with no capital expenditures, extra human resources or infrastructure to deploy and manage.
- Secure, with complete end-to-end data encryption.

WHAT IS AT RISK?

COMPANY DATA AND RESOURCES

CLIENT PERSONAL DATA FROM YOUR DATABASE

THE COMPANY IMAGE

MONEY! AN INTRUDER CAN CHANGE THE PRICE FOR PRODUCTS AND SERVICES IN YOUR DATABASE

YOUR BUSINESS MIGHT BE AT RISK

DATAEYE VULNERABILITY ASSESSMENT

Network auditing and vulnerability management across the enterprise, including network discovery and mapping, asset prioritization, vulnerability assessment reporting and remediation tracking according to business risk.

DataEye Consulting Vulnerability Assessment Services enables small to large organizations to effectively manage their vulnerabilities and maintain control over their network security with centralized reports, verified remedies, and full remediation workflow capabilities

Vulnerability Assessment Services reduces security managers' time researching, scanning and fixing network exposures and enables companies to eliminate network vulnerabilities before they can be exploited.

DATAEYE WEB APPLICATION SCANNING

Web Application Scanning enables organizations to assess, track and remediate web application vulnerabilities. Delivered on demand, the new service allows users to:

- Crawl web applications
- Identify cross-site scripting and SQL injection vulnerabilities
- Detect sensitive content in HTML based on user settings
- Conduct authenticated and non-authenticated scanning

DataEye Consulting is testing web application vulnerabilities such as those in the OWASP Top 10 and WASC-TC, including "SQL injection", "cross-site scripting" and "web site misconfigurations".

DataEye Consulting does expression searches for content in HTML, such as social security numbers, credit cards as well as custom strings.

STATISTICS

 **GIVEN TIME, RESOURCES, AND MOTIVATION, A CRACKER CAN BREAK INTO NEARLY ANY SYSTEM.**

 **ALL OF THE SECURITY PROCEDURES AND TECHNOLOGIES CURRENTLY AVAILABLE CANNOT GUARANTEE THAT ANY SYSTEMS ARE SAFE FROM INTRUSION.**

 **37% OF WORKERS SAY THEY SURF THE WEB CONSTANTLY AT WORK**

 **63% OF COMPANIES MONITOR WORKERS' INTERNET CONNECTIONS AND 47% STORE AND REVIEW EMPLOYEE E-MAIL**

 **27% OF COMPANIES SAY THAT THEY'VE FIRED EMPLOYEES FOR MISUSE OF OFFICE E-MAIL OR INTERNET CONNECTIONS, AND 65% REPORT SOME DISCIPLINARY MEASURE FOR THOSE OFFENSES.**

 **30 TO 40% OF INTERNET ACCESS IS SPENT ON NON WORK RELATED BROWSING, AND A STAGGERING 60% OF ALL ONLINE PURCHASES ARE MADE DURING WORKING HOURS**

 **THE AVERAGE FRAUD INFLECTS A LOSS OF ABOUT \$110,000 PER CORPORATE/ORGANIZATION VICTIM, AND \$15,000 TO EACH INDIVIDUAL VICTIM.**

 **AROUND 80% OF COMPUTER CRIME IS COMMITTED BY "INSIDERS". THEY MANAGE TO STEAL \$100 MILLION BY SOME ESTIMATES; \$1 BILLION BY OTHERS.**
